

WASTE COLLECTION STUDY ENGAGEMENT PLAN

OBJECTIVE

The District would like to directly engage residents and stakeholders in the Waste Collection Study to understand the level of public support for the initiatives (waste collection and a yard waste facility) and ensure Council’s decisions are informed by community input.

GOALS

- Ensure residents are informed of the process and have opportunities to participate.
- Engage residents and stakeholders in dialogue on the challenges and opportunities.
- Ensure residents’ and stakeholders’ concerns and ideas are understood, reflected back to Council and published in a public document.

SPECTRUM OF PUBLIC PARTICIPATION

On the IAP2 spectrum of public participation, this project’s public participation goal has been determined to be at the **Involve** level—meaning our promise to the general public is: *We will work with you to ensure your concerns and aspirations are reflected and provide feedback on how public input influenced the decision.* (It is important to note that as we move through the project, the consultation will fluctuate from inform to involve and consult and back again, depending on the group and stage of the project).

Components	Time frame
Inform public (Let’s Talk site, website, social media)	December 2022+
Public engagement (Community Satisfaction Survey, open house, survey, direct mail, media)	February-March 2022
Stakeholder engagement (meetings)	February-March 2022
Data analysis	March-April 2022
Report back to Council and public (What We Heard report)	April-May 2022
